

FOR IMMEDIATE RELEASE:

PREGL ANNOUNCES FURNACE MATE™ HOT ZONE PROJECT.

NO CHAMBER MODIFICATION NEEDED FOR NEW HOT ZONE INSTALL.

JANESVILLE, Wisconsin (November 3, 2014) – Pregl Services, Inc. (Pregl), providers of comprehensive aftermarket support to the thermal processing industry, today announced they were recently contracted to replace a large vacuum furnace hot zone with a new Pregl Furnace Mate™ Hot Zone.

A major concern for this Midwestern customer, a significant heat treater in the tooling industry, was being able to install a new hot zone without having to modify their existing furnace chamber. Pregl conducted a full on-site inspection and analysis to collect and verify all engineering data for this project. “To maximize the performance of your furnace, all Pregl Furnace Mate™ Hot Zones are specifically engineered to match the form, fit and function of your original hot zone with no modifications to your chamber”, said President of Pregl Services, Andrew Pregl. The newly hand-crafted Pregl Furnace Mate™ Hot Zone will be built at Pregl’s facility in Janesville, Wisconsin.

To learn more about Pregl’s new and rebuilt hot zones, and replacement parts for major vacuum furnace brands from Pregl Express Parts™, please visit www.pregl.com or call 608.314.8260.
